

For remote zoom and focus
during installation.

Description of P-Iris

- P-Iris = Precise Iris
- Contains steppingmotor instead of galvanometer
- Digital iris control
- Optimizes irisopening under any lightcondition

Advantages of P-Iris

- Improves contrast
- Better depth of field (perfect when e.g. monitoring long corridor or parking lot)
- Achieves the maximum resolution due to “critical aperture”
- Improved image sharpness

Advantages of P-Iris

- Especially for megapixel applications
- Also improvements when using VGA
- Primary task is to focus iris on center of lens
→ 'best' part of lens is used

P-Iris in practise

GANZ
PixelPro

- ZN-DT1MA and ZN-DT2MA have P-Iris
- Built-in 3.3-12mm MFZ Varifocal Lens
- 1080p Model (also available in 720p)

VSoIP
VIDEO SURVEILLANCE
OVER INTERNET PROTOCOL

Motorized Zoom and Focus

- Remote Zoom and Focus for easy installation
- Access via Internet Explorer
- Autofocus available
